Catalog Number	Product	Description
2711-NC13	Upload/Download Cable	For 1000/1000e terminals only. Includes a 9-pin RS-232 serial cable (Upload/Download cable) to transfer files between terminal and development computer. The cable is 16.4 ft (5 m) long.
2711-NC14	Upload/Download Cable	For 1000/1000e terminals only. Includes a 9-pin RS-232 serial cable (Upload/Download cable) to transfer files between terminal and development computer. The cable is 32.7 ft (10 m) long.
2706-NC13	Upload/Download Cable	For 1000/1000e terminals only. Includes a 9-pin RS-232 serial cable (Upload/Download cable) to transfer files between terminal and development computer. The cable is 10 ft (3 m) long.

## Equipment Required for Transferring Applications

This section describes the equipment required to perform the following application transfers:

- serial transfer
- DH+ network direct transfer
- ControlNet network direct transfer
- Remote I/O Pass-Through transfer

### Serial Upload/Download

To transfer applications serially, you need an RS-232 Serial (Upload/Download) cable (A-B Catalog Numbers 2706-NC13, 2711-NC13, 2711-NC14 for PanelView 1000e terminals; 2711-NC1 for PanelView 1200/1200e/1400e terminals) for connecting the computer to the PanelView terminal.

**FTU32** The 1200e/1400e Transfer Utility can transfer applications serially without using the RSLinx drivers.

**FTU** Both the 1200 and 1200e/1400e Transfer Utility can transfer applications serially without using INTERCHANGE or WINTelligent LINX drivers. For information on PanelView 1200 serial transfers, see the PanelView 1200 Transfer Utility User Manual (Publication Number 2711-811).
